DRAGON NATURALLYSPEAKING 11 PREMIUM

Version 10 and 11 Comparison

version 10
2008

version 11
2010

FEATURE	DESCRIPTION	VERSION 10 - 2008	VERSION 11 - 2010
Core Speech Recognition Accuracy	Fewer speech recognition errors "out of the box"	up to 20% more accurate than Version 9; significant increase in accuracy for accented speakers by using more advanced adaptation techniques and accent-specific models	15% fewer speech recognition errors out of the box than Version 10; introduces Recognition Analytics (Dragon automatically detects poor audio input and alerts the user, offering advice to remedy the situation); multi-core support makes use of machines with multi-core architecture
Speed	Most people speak about 120 words per minute, but type fewer than 40 words a minute. Dragon lets users create documents about three times faster than typing by hand.	Words appear on the screen as soon as they're dictated -- more than 50% reduction of latency time (delay); installation automatically detects PC's resources and adjusts options for optimal speed	Faster response times for commands
Formatting and Editing Text	Ability to control the way words appear in documents	Introduces Quick Voice Formatting (one-step commands to delete, bold, underline, italicize, and copy text and passages); new Formatting dialog and Word Properties let you control the written forms more finely than ever, including alternate forms, spacing and capitalization before and after each item	Multiple match indicator allows users to edit/format multiple instances of a word or phrase; enhanced correction menu and spelling window; new "don't recognize again" command; Dragon "learns" from corrections, including keyboard corrections, faster than ever before
